Supporting Product Sustainability

Deliver more sustainable products, reduce costs and enhance your brand: GaBi Envision enables you to quickly understand and communicate the sustainability performance of your products and compare alternative product designs, without the need to be an LCA expert!

Enabling LCA for Everybody

Easily integrate Life Cycle Assessment (LCA), Environmental Product Declaration (EPD) or any kind of environmental footprinting into your internal processes, quickly evaluate 'what-if' scenarios and communicate effectively using standardizable reports.

"For us, GaBi Envision is a both straightforward and powerful LCA tool that is used in several departments inside Saint Gobain. Especially for our non-LCA practitioners, it is very helpful as it allows us to compare different design scenarios simply by changing parameters, giving us immediate results about environmental impacts. This greatly accelerates our internal decision making."

Michaël Medard,
Life Cycle Assessment Manager,
Saint-Gobain

How GaBi Envision Works

Once an LCA is modelled in the GaBi ts Software, simply import the file into GaBi Envision. In this intuitive web application you can easily use and change parameters of your models and thus compare different scenarios of your product design. Then simply with the push of a button create and export your LCA report in your corporate design as a PDF or RTF file!

GaBi Envision Enables You to

- Calculate LCAs and EPDs
- Generate carbon & water footprinting
- Create 'what-if' scenarios
- Compare alternative product designs

Boost Your Productivity

You can connect to or even integrate GaBi Envision via API into your existing IT infrastructure (e.g., CAD, PLM or ERP) to automate the creation of LCAs and EPDs. This saves time and increases the profitability of your environmental efforts!

Fast, Standardized Reporting

Easily communicate the sustainability performance of products to coworkers with pre-defined, configurable templates, including official reporting schemes like Environmental Product Declarations (EPDs) from wherever you are in the world.

**ACCELERATE DECISION
MAKING AND REDUCE
TIME TO MARKET**

**GET FAST LCA RESULTS
EVEN AS A NON-LCA
EXPERT**

**EASILY COMPARE
DESIGN ALTERNATIVES**

**INCREASE YOUR
EFFICIENCY USING
GABI ENVISION API**

**CREATE AUTOMATED
REPORTS WITH ONLY
ONE CLICK**
